Great cinema requires great technology. For three decades now, international film festivals have been among our most loyal partners – and we are delighted to once again support the Berlinale as an official partner for communication technology in 2026.

For over ten years, we have been providing the infrastructure, radios, and technical support for Berlin's most prestigious film festival. It is a partnership built on trust, precision, and a passion for excellent transmission.

Digital Precision at Potsdamer Platz

A particular highlight of this year's setup is the Kino am Potsdamer Platz. To meet the demanding on-site requirements, we are deploying a dedicated digital Motorola radio cell (outdoor). This ensures seamless coverage and crystal-clear communication – even during the most intense phases of the festival.

Our Equipment for the Red Carpet

Across all venues in 2026, we are relying on a mix of proven robustness and cutting-edge innovation:

Motorola R7 Premium: Our current flagship offers world-class audio quality and advanced features for high-end event management.

Motorola DP4800e: The "indestructible classic" of our rental fleet, known for its reliability and ease of use.

Top-Tier Support

Technical support on-site this year is provided by an experienced team: our technicians Oliver and Thorsten are accompanying the festival around the clock. The fact that Oliver is acting not only as a technician but also in his role as Managing Director underscores the significance the Berlinale holds for our company – an event that simply cannot be missed.

As a Motorola Platinum Partner and one of the leading experts for radio technology in Europe, we offer tailored solutions for major events – from initial planning to on-site support. We thank the Berlinale for their long-standing trust and look forward to a successful festival season.

Everything back to the beginning – see you at the next Berlinale!
