Heatmap Software (radio coverage)

Our Heatmap Tool quickly and reliably visualizes the radio coverage in a desired area (indoor and outdoor). Measurement results can be transferred manually or automatically (location capability via GPS or Bluetooth beacons required). The application is cooperation, i.e. several employees* can work on a heat map at the same time. The result can be saved either as an informative weather map as a PDF file or as a CAD file for further processing (e.g. in AutoCAD or Vectorworks).

Fleet Management Software (Dispatcher Software)

The Fleet Management & Dispatcher Software of Spreenauten GmbH is ideal if you are looking for a clear and effective administration application for your radio technology. We are also happy to implement individual wishes and expand our application permanently. Offered as SAAS (Cloud, location: Frankfurt am Main) or as local installation. Both at very advantageous conditions.

Automation Accounting

Especially for small and medium-sized companies - and especially for those that should grow quickly in a short time (also) the financial accounting should be automated early. We have developed a mobile application for accounting automation from the learnings of the last years...

Antenna Rings for Radios

Antenna rings are a practical and very (very) cost-effective way of assigning radios to a group optically - and thus recognisable at first glance. We offer them in many different colours and designs...
